### **Message of solidarity from CSQ to UNISON**

La Centrale des syndicats du Québec (CSQ) wishes to support our union allies of the United Kingdom affiliated with UNISON in their struggle to safeguard the public health system in Britain. The current Health and Social Care Bill introduced by the British government will weaken the National Health System and encourage the privatization of care and services.

CSQ remains absolutely convinced that only a public health system ensures the right of all citizens to receive quality health care regardless of income. The British system was one of the most credible leaders in the world in that regard and this must continue.

It is therefore in total solidarity that the CSQ wants to express its opposition against this bill. Undermining the NHS will not only hurt the British people but also those of other countries with systems based on the British model, including Canada .
